**Seek**, *v. i.* 1. To make search or inquiry. 2. To endeavor; to attempt; to strive.

**Seek'er**, *n.* 1. One who seeks; an inquirer. 2. One of a sect who profess no determinate religion.

**Seel**, *v. t.* [*imp.* & *p. p.* SEELED; *p. pr.* & *vb. n.* SEELING.] [Fr. *siller*, *ciller*, from *cil*, Lat. *cilium*, an eyelash.] 1. To render incapable of seeing by sewing the eyelids together. 2. Hence, to shut the eyes of; to render blind.

**Seem**, *v. i.* [*imp.* & *p. p.* SEEMED; *p. pr.* & *vb. n.* SEEMING.] [Prov. Eng. *seem*, to think, imagine; O. Eng. *seem*, to become, befit; A.-S. *sēman*, to judge, appease; Goth. *samjan*, to please; Icel. *sōma*, to become, beseem.] To have a show or semblance; to present an appearance.

**Syn.**—To appear; look.—To *appear* has reference to a thing's being presented to our view; as, the sun *appears*; to *seem* is connected with the idea of *semblance*, and usually implies an inference of our mind as to the probability of a thing's being so; as, a storm *seems* to be coming. "The story *appears* to be true" means that the facts, as presented, go to show its truth; "the story *seems* to be true" means it has the semblance of being so, and we infer that it is true.

*Should seem, would seem.*—These phrases differ only in strength. We use "*should seem*" when the case is so strong as to render the inference almost a *necessary* one; we use "*would seem*" to express a prevailing *semblance* or probability, with perhaps a slight implication that the case may be otherwise. Mr. Pickering supposed "*would seem*" to be a peculiarity of America; it is used, however, by English writers in the sense given above.

**Seem'er**, *n.* One who seems; one who carries an appearance or semblance. [*of.*]

**Seem'ing**, *p. a.* Appearing like; having the semblance.

**Syn.**—Apparent; specious. See APPARENT.

**Sen-sā'tion**, *n.* [From Lat. *sensus*, *sense*.] **1.** An impression made upon the mind through the medium of the organs of sense. **2.** Agreeable or disagreeable feelings occasioned by objects not corporeal or material. **3.** A state of excited interest or feeling.

**Syn.** — Perception. — The distinction between *sensation* and *perception*, when used in mental philosophy, may be thus stated: If I simply *smell* a rose, I have a *sensation*; if I refer that smell to the external object which occasioned it, I have a *perception*. Thus the former is mere feeling, without the idea of an object; the latter is the mind's apprehension of some external object as occasioning that feeling.

**Sen-sā'tion-al**, *a.* **1.** Pertaining to the sensations. **2.** Attended by, or fitted to excite, great interest.

**Sen-sā'tion-al-ism**, *n.* The doctrine that our ideas originate solely in sensation, and consist of sensations transformed.

*Common sense*, "such ordinary complement of intelligence, that, if a person be deficient therein, he is accounted mad or foolish."

**Syn.** — Understanding; reason. — Some philosophers have given a technical signification to these terms, which may here be stated. *Sense* is the mind's acting in the direct cognition either of material objects or of its own mental states. In the first case, it is called the *outer*, in the second, the *inner*, sense. *Understanding* is the logical faculty, i. e., the power of apprehending under general conceptions, or the power of classifying, arranging, and making deductions. *Reason* is the power of apprehending those first or fundamental truths or principles which are the conditions of all real and scientific knowledge, and which control the mind in all its processes of investigation and deduction. These distinctions are given, not as established, but simply because they often occur in writers of the present day.

**Sēnse'less**, *a.* **1.** Destitute of sense; incapable of feeling; insensible. **2.** Wanting appreciation or sympathy; without sensibility. **3.** Destitute of understanding; foolish; stupid. **4.** Contrary to reason or sound judgment; unwise; ill-judged; foolish.

**Sēn'ti-ment**, *n.* [From Lat. *sentire*, to perceive, feel, think.] **1.** A thought prompted by passion or feeling; feeling toward or respecting some person or thing. **2.** The decision of the mind formed by deliberation or reasoning. **3.** A sentence, or passage, considered as the expression of a thought; a maxim; a toast. **4.** Sensibility; feeling; tender susceptibility.

**Syn.** — Thought; opinion; notion; sensibility; feeling. — An *opinion* is an intellectual judgment in respect to any and every kind of truth. *Feeling* describes those affections of pleasure and pain which spring from the exercise of our sentient and emotional powers. *Sentiment* (particularly in the plural) lies between them, denoting *settled opinions* or principles in regard to subjects which interest the feelings strongly, and are presented more or less constantly in practical life. Hence it is more appropriate to speak of our religious *sentiments* than *opinions*, unless we mean to exclude all reference to our feelings. The word *sentiment*, in the singular, leans ordinarily more to the side of feeling, and denotes a refined sensibility on subjects affecting the heart.

**Sēn'ti-mēnt'al**, *a.* **1.** Abounding with sentiments or reflections. **2.** Hence, having an access of sentiment or sensibility; artificially or affectedly tender.

**Syn.** — Romantle. — *Sentimental* usually describes an error or excess of the sensibilities; *romantic*, a vice of the imagination. The votary of the former gives indulgence to his sensibilities for the mere luxury of their excitement; the votary of the latter allows his imagination to rove for the pleasure of creating scenes of ideal enjoyment, and gazing on the creations which he has made. One who is *sentimental* is apt to be laughed at; one who is *romantic* not unfrequently falls into fatal errors.

It thus ordinarily expresses, in the second and third persons, a command, a threat, or a promise. It is also employed in the language of prophecy. In *shall* with the first person, the necessity of the action is sometimes implied as residing elsewhere than in the speaker, as, I *shall* suffer; we *shall* see; and there is always a less distinct and positive assertion of his volition than is indicated by *will*. "I *shall* go" implies nearly a simple futurity; more exactly, a foretelling or an expectation of my going, in which, naturally enough, a certain degree of plan or intention may be included. In a question, the relation of speaker and source of obligation is of course transferred to the person addressed. After a conditional conjunction, as *if*, *whether*, *shall* is used in all persons to express futurity simply. *Should* is every where used in the same connection and the same senses as *shall*, as its imperfect. It also expresses duty or moral obligation. See WILL.

**Syn.**— Keen; vexatious; troublesome; critical; subtle; artful; discerning; acute; sagacious. — *Shrewd* originally meant *keen*, but *fault-finding* or *contentious*. This latter sense is now dropped, and yet, perhaps, it slightly influences the present application of the word. One who is *shrewd* is keen to detect errors, to penetrate false disguises, to foresee and guard against the selfishness of others. It is not, therefore, a word of as much dignity as *sagacious*, which leads us to think of a man as possessing a comprehensive as well as penetrating mind, whereas *shrewd* does not.

**Shrewd'ly** (*shryd'ly*), *adv.* Archly; sagaciously; with good guess.

**Shrewd'ness** (*shryd'ness*), *n.* Quality or state of being shrewd; astuteness; sagacity.

**Stȳg'i-an, a.** [Lat. *Stygius*, from Gr. *Στύξ*, *Στυγός*, the

*Styx*, *i. e.*, the Hateful, from *στυγείν*, to hate.] Of, or

pertaining to, *Styx*, fabled by the ancients to be a river

of hell over which the shades of the dead passed, or the

region of the dead; hence, hellish; infernal.

**Stȳ'lar, a.** Of, or pertaining to, the stile of a dial; stilar.

**Stȳle, n.** [Lat. *stylus*, *stilus*, Gr. *στυλος*,

a pillar, a writing instrument.] 1. An

instrument used by the ancients in writ-

ing on tablets covered with wax. 2.

Hence, any thing resembling the ancient

style; as, (a.) A sharp-pointed tool used

in engraving. (b.) A pointed surgical

instrument. (c.) The pin or gnomon of

a dial. (d.) (*Bot.*) The cylindrical and

tapering portion of the pistil between the

ovary and the stigma. 3. Mode of ex-

pressing thought in language, whether

oral or written; choice of words. 4. Mode

of presentation, especially in music or any

of the fine arts. 5. Regard to what is

deemed elegant and appropriate, especially in literary

composition or in social demeanor; fashion. 6. Mode

or phrase by which any thing is formally designated; the

title; official designation. 7. (*Chron.*) A mode of reckon-

ing time.

**Syn.**—Style is *Old* or *New*. The *Old Style* follows the manner

of computing the months and days established by Julius

Cæsar, according to which every fourth year consists of 366

days, and the other years of 365 days. This is about 11 minutes in

a year too much. Pope Gregory XIII. reformed the calendar by

retrenching 10 days in October, 1582, in order to bring back the

vernal equinox to the same day as at the time of the council of

Nice, A. D. 325. This reformation was adopted by act of Par-

liament in Great Britain in 1751, by which act 11 days in Sep-

tember, 1752, were retrenched, and the 3d day was reckoned

the 14th. This mode of reckoning is called *New Style*, accord-

ing to which every year divisible by 4, (unless it is divisible by

100 without being divisible by 400), has 366 days, and any other

year 365 days.

(*c.*) An elevated feeling of astonishment and awe, at the contemplation of great scenes and objects, or of exalted excellence. **2.** Loftiness of sentiment or style.

**Syn.**—Grandeur; magnificence.—The mental state indicated by these two words is the same, namely, a mingled emotion of astonishment and awe. In speaking of the quality which produces this emotion, we call it *grandeur* when it springs from what is vast in space, power, &c.; we call it *sublimity* when it springs from what is elevated far above the ordinary incidents of humanity. An immense plane is *grand*. The heavens are not only *grand*, but *sublime* (as the predominating emotion), from their immense height. Exalted intellect, and especially exalted virtue under severe trials, gives us the sense of moral *sublimity*, as in the case of our Savior, in his prayer for his murderers. We do not speak of Satan, when standing by the fiery gulf, with his "unconquerable will and study of revenge," as a *sublime* object; but there is a melancholy *grandeur* thrown around him, as of "archangel ruined."

[In the last two senses commonly written *subtle*.]

**Syn.**— Acute; shrewd; artful; cunning.— In *acute* the image is that of a needle's point; in *subtile* that of a thread spun out to extreme fineness. Hence, he who is *acute* has a piercing judgment, which enables him to discern and discriminate with the nicest accuracy; he who has a *subtile* intellect can spin the finest thread of thought, and follow out a subject in its most complicated relations, without letting go his hold, or becoming lost or perplexed in its utmost intricacies. *Acuteness* guards against error; *subtility* carries forward our investigations into tenuous and recondite truths. The former belongs more to speculative and abstract inquiries; the latter to the philosophy of the heart and of social life. Edwards was singularly *acute*; Lord Bacon had a *subtility* of intellect which seemed to spread itself throughout every part of a subject like a kind of "diffusive touch."

**Syn.**—Identical; interchangeable.—If no words are *synonymous* except those which are *identical* in use and meaning, so that the one can in all cases be substituted for the other, we have scarcely ten such words in our language. But the term more properly denotes that the words in question approach so near to each other, that, in many or most cases, they can be used interchangeably. **1.** Words may thus coincide in *certain* connections, and so be interchanged, when they cannot be interchanged in other connections; thus we may speak either of *strength* of mind or of *force* of mind, but we say the *force* (not *strength*) of gravitation. **2.** Two words may differ slightly, but this difference may be unimportant to the speaker's object, so that he may freely interchange them; thus it makes but little difference, in most cases, whether we speak of a man's having *secured* his object or having *attained* his object. For these and other causes we have numerous words which may, in many cases or connections, be used interchangeably, and these are properly called *synonyms*.

**Syn-ōn'y-mōŭs-ly**, *adv.* In a synonymous manner.

**Syn-ōn'y-my**, *n.* **1.** Quality of being synonymous. **2.** (*Rhet.*) A figure by which synonymous words are used to amplify a discourse.

## T.

**T** (*te*), the twentieth letter of the English alphabet, is a simple consonant, allied to both *D* and *N*, all three of these letters being dental elements. When *t* is followed by *h*, as in *think* and *that*, the combination really forms a distinct sound, for which we have no single character. This combination has two sounds in English; surd or whispered, as in *think*, and sonant or vocal, as in *that*. See *Prin. of Pron.* §§ 96 — 100.

To suit or fit to a *T*, to suit exactly; to answer perfectly; — perhaps so used with reference to a carpenter's T-square.

**Syn.** — Genius; ability; faculty; gift; endowment. See GENIUS.

**Tāl'ent-ed**, *a.* Furnished with talents or skill.

This word has been strongly objected to by Coleridge and some other critics, but, as it would seem, upon not very good grounds, as the use of *talent* or *talents* to signify mental ability, although at first merely metaphorical, is now fully established, and *talented*, as a formative, is just as analogical and legitimate as *gifted*, *bigoted*, *turreted*, *targeted*, and numerous other adjectives having a participial form, but derived directly from nouns, and not from verbs.

**Tāl'ēs**, *n. pl.* [Lat., pl. of *talīs*, such.] (*Law.*) A supply of persons from those in or about the court-house to make up any deficiency in the number of jurors regularly summoned, being like, or *such*, as the latter.

**Syn.**—Savor; relish; flavor; sensibility; judgment.—Some consider *taste* as a mere *sensibility*, and others as a simple exercise of *judgment*; but a union of both is requisite to the existence of any thing which deserves the name. An original sense of the beautiful is just as necessary to esthetic judgments, as a sense of right and wrong to the formation of any just conclusions on moral subjects. But this "sense of the beautiful" is not an arbitrary principle. It is under the guidance of reason; it grows in delicacy and correctness with the progress of the individual and of society at large; it has its laws, which are seated in the nature of man; and it is in the development of these laws that we find the true "standard of taste."

**Tēar'less**, *a.* Shedding no tears; without tears.

**Tēase**, *v. t.* [*imp. & p. p.* TEASED; *p. pr. & vb. n.* TEASING.] [A.-S. *tæsan*, to pluck, tease, O. H. Ger. *zeisan*, to pluck, pull. Cf. **TOUSE**.] **1.** To comb or card, as wool or flax. **2.** To scratch, as cloth in dressing, for the purpose of raising a nap. **3.** To harass, annoy, disturb, or irritate, by petty requests, or by jests and raillery.

**Syn.**—To vex; plague; torment; mortify; tantalize; chagrin.—To *tease* is literally to pull or scratch, and implies a prolonged annoyance in respect to little things, which is often more irritating and harder to bear than severe pain. *Vex* meant originally to seize and bear away hither and thither, and hence, to disturb; as, to *vex* the ocean with storms. This sense of the term now rarely occurs; but *vex* is still a stronger word than *tease*, denoting the disturbance or anger created by minor provocations, losses, disappointments, &c. We are *teased* by the buzzing of a fly in our ears; we are *vexed* by the carelessness or stupidity of our servants.

To bring to terms, to make to submit or agree.—To make terms, to come to terms; to make an agreement; to agree.

**Syn.**—Word.—*Term* signifies a word of specific meaning, applicable to a definite class of objects. It is therefore more determinate and technical than *word*, which denotes an utterance that represents or expresses our thoughts and feelings. Hence we speak of a scientific *term* (not *word*), and of stating things in distinct *terms*, &c. Still, in a looser sense, it is used to a great extent interchangeably with *word*, for variety of expression.

**Tērm**, *v. t.* [*imp.* & *p. p.* TERMED; *p. pr.* & *vb. n.* TERMING.] To apply a term to; to name; to call; to denominate.

**Tērse** (14), *a.* [*compar.* TERSER; *superl.* TERSEST.] [Lat. *tersus*, *p. p.* of *tergere*, to rub or wipe off.] Elegantly concise; compact with smoothness, grace, or elegance.

**Syn.**—Concise. — *Terse* was defined by Johnson "cleanly written," *i. e.*, free from blemishes, neat, or smooth. Its present sense is "free from excrescences," and hence compact, with smoothness, grace, or elegance, as in the following lines of Whitehead:—

"In eight *terse* lines has Phædrus told  
(So frugal were the bards of old)  
A tale of goats; and closed with grace,  
Plan, moral, all, in that short space."

It differs from *concise* in not implying perhaps quite as much condensation, but chiefly in the additional idea of "grace or elegance."

**Tērse'ly**, *adv.* In a terse manner; neatly; concisely.

**Tērse'ness**, *n.* The state or quality of being terse; neatness; conciseness; succinctness.

**Tēr'tial**, *n.* [From Lat. *tertius*, third, because they are feathers of the third row.] (*Ornith.*) One of the quills or large feathers near the junction of the wing with the body.

Examination by the cupel; hence, any critical trial and examination. 3. Means of trial. 4. That with which any thing is compared for proof of its genuineness; a standard. 5. Ground of admission or exclusion. 6. Judgment; distinction; discrimination. 7. (*Chem.*) A substance em-

ployed to detect any unknown constituent of a compound, by causing it to exhibit some characteristic property; a re-agent.

**Test-act** (*Eng. Law*), an oath and declaration against transubstantiation, which all officers, civil and military, were formerly obliged to take within six months after their admission.

**Syn.**—Criterion; standard; experience; proof; experiment; trial. — *Trial* is the wider term; *test* is a searching and decisive trial. It is derived from the Latin *testa* (earthen pot), which term was early applied to the *fining-pot*, or *crucible*, in which metals are melted for trial and refinement. Hence the peculiar force of the word, as indicating a trial or criterion of the most decisive kind.

**Tēst**, *v. t.* [*imp. & p. p.* TESTED; *p. pr. & vb. n.* TESTING.] 1. (*Metal.*) To refine, as gold or silver, by means of lead, in a test. 2. To put to the proof; to prove the truth or genuineness of by experiment, or by some fixed principle or standard. 3. (*Chem.*) To examine or try by the application of test-paper, or some re-agent.

**To** (tō when emphasized, or standing alone, but tō when not emphatic), *prep.* [A.-S. *tō*, Goth. *du*, for *tu*, Ir. & Gael. *do.*] 1. It primarily indicates approach and arrival, motion made in the direction of a place or thing and attaining it, access; and, also, motion or tendency without arrival; it is opposed to *from*. 2. Hence, it indicates motion, course, or tendency toward a time, a state or condition, an aim, or any thing capable of being regarded as a limit to movement or action. 3. Hence, further, in a very general way, and with innumerable varieties of application, it connects transitive verbs with their remoter or indirect object, and adjectives, nouns, and neuter or passive verbs with a following noun which limits their action. 4. As sign of the infinitive, *to* had originally the use just defined, governing the infinitive as a verbal noun, and connecting it as indirect object with a preceding verb or adjective. But it has come to be the almost constant prefix to the infinitive, even in situations where it has no prepositional meaning. 5. In many phrases, and in connection with many other words, *to* has a pregnant meaning, or is used elliptically: thus it denotes or implies, (a.) Extent; limit; degree of comprehension. (b.) Effect; end; consequence. (c.) Apposition; connection; antithesis; opposition. (d.) Accord; adaptation. (e.) Comparison. (f.) Addition; union. (g.) Accompaniment.

*To-day, to-night, to-morrow*, are peculiar phrases derived from our ancestors. *To*, in the two first, has the sense or force of *this; this day, this night*. In the last, it is equivalent to *in or on; in or on the morrow*.

*To and fro*, backward and forward. In this phrase *to* is adverbial. — *To the face*, in presence of; not in the absence of. — *To wit*, to know; namely.

*To* is often used adverbially to modify the sense of verbs; as, *to come to; to heave to*.

*Transcendental quantity* (*Math.*), a quantity which can not be represented by an algebraic expression of a finite number of terms.  
**Syn.** — Empirical. — *Transcendental* and *empirical*, with the corresponding nouns, *transcendentalism* and *empiricism*, are of comparatively recent origin. *Empirical* refers to knowledge which is gained by the experience of actual phenomena, without reference to the principles or laws to which they are to be referred, or by which they are to be explained. *Transcendental* has reference to those beliefs or principles which are not derived from experience, and yet are absolutely necessary to make experience possible or useful. Such, in the better sense of the term, is the *transcendental* philosophy, or *transcendentalism*. Each of these words has also been used in a bad sense. *Empiricism*, in this case, is applied to that one-sided view of knowledge which neglects or loses sight of the truths or principles referred to above, and trusts to experience alone. *Transcendentalism* has been applied to the opposite extreme, which, in its depreciation of experience, loses sight of the relation which facts and phenomena sustain to principles. Hence the term has been applied to a kind of investigation, or a use of language, which is vague, obscure, fantastic, or extravagant.  
**Trān'scēnd-ēnt'al-ism**, *n.* (*Kantian Philos.*) The transcending or going beyond empiricism, and ascertaining *a priori* the fundamental principles of human knowledge.  
**Syn.** — The word is also sometimes used for that which is vague and illusive in philosophy.

## U.

**U** (yoo) is the twenty-first letter and the fifth vowel in the English alphabet. Its true primary sound, in Anglo-Saxon, was the sound which it still retains in most of the languages of Europe — that of *oo* in *cool*, *tool*. This sound was changed to that heard in the words *use*, *tube*, &c., probably in consequence of the attempt made to introduce the Norman-French language into common use in England. Besides these two sounds, *u* has also two other sounds, as exemplified in the words *but*, *bull*. See *Prin. of Pron.* §§ 29-34, and §§ 52, 53. The vowel

*U* has a close affinity to the consonant *v*, and these two letters were formerly confounded in writing and printing.

*Syn.* — Custom. — Custom is the frequent repetition of the same act either by one or many; usage belongs to the great body of a people, and implies a use or practice which is so fully established as to have decisive authority. Hence we speak of usage (not custom) as the law of language.  
**Ūse** (yuz), *v. t.* [*imp.* & *p. p.* USED; *p. pr.* & *vb. n.* USING.] [From Lat. *uti*, *usus*, to use.] **1.** To make use of; to convert to one's service; to put to a purpose. **2.** To behave toward; to act with regard to; to treat. **3.** To practice customarily. **4.** To accustom; to habituate.  
*Syn.* — Employ. — We use a thing, or make use of it, when we derive from it some enjoyment or service. We employ it when we turn that service into a particular channel. We use words to express our general meaning; we employ certain technical terms in reference to a given subject. To make use of implies a kind of passive agency; as, to make use of a pen; and hence there is often a material difference between the two words when applied to persons. To speak of "making use of another" generally implies a degrading idea, as if we had used him as a tool; while employ has no such sense. A confidential

friend is *employed* to negotiate; an inferior agent is *made use of* to carry on an intrigue.

**Use**, *v. i.* To be wont or accustomed; to practice customarily.

**Use'ful**, *a.* Full of use, advantage, or profit; producing, or having power to produce, good; beneficial; profitable.

**Use'ful-ly**, *adv.* In a useful manner; profitably.

**Use'ful-ness**, *n.* State or quality of being useful; conciseness to some end, properly to some valuable end.

**Syn.**—Utility; serviceableness; value; advantage; profit. See UTILITY.

**Use'less**, *a.* Having no use; unserviceable; producing no good end; answering no valuable purpose.

**Syn.**—Fruitless; ineffectual.—We speak of an attempt, &c., as *useless* (not capable of being used to effect) when there are in it inherent difficulties which forbid the hope of success; as, it is *useless* to contend against the decisions of Providence. We speak of it as *fruitless* when it fails, not from any such difficulties, but from some unexpected hindrance or calamity arising to frustrate it; as, the design was rendered *fruitless* by the death of its projector. It is *useless* to attempt any thing without adequate means; and even when we do possess them, our efforts are often *fruitless*. *Ineffectual* nearly resembles *fruitless*, but implies a failure of a less hopeless character; as, after several *ineffectual* efforts, I at last succeeded.

**Use'less-ly**, *adv.* In a useless manner; without profit or advantage.

**Use'less-ness**, *n.* State or quality of being useless; unserviceableness.

**Us'er**, *n.* One who uses, treats, or occupies.

**Ush'er**, *n.* [O. Fr. *ussier*, *uissier*, *oissier*, *hussier*, *huissier*, from *us*, *uis*, *ois*, *hus*, *huis*, *hues*, *huix*, *wuis*, a door.]

**U-tíl/i-tä'ri-an** (89), *a.* [From Lat. *utilitas*, utility.] Consisting in, or pertaining to, utility; pertaining to utilitarianism.

**U-tíl/i-tä'ri-an**, *n.* One who holds the doctrine of utilitarianism.

**U-tíl/i-tä'ri-an-ism**, *n.* **1.** The doctrine that the greatest happiness of the greatest number should be the end and aim of all social and political institutions. **2.** The doctrine that virtue is founded in utility. **3.** The doctrine that utility is the sole standard of virtue, so that virtue is indicated and tested by its apparent usefulness.

**U-tíl/i-ty**, *n.* [Lat. *utilitas*, from *utilis*, useful.] State or quality of being useful; production of good.

**Syn.**—Usefulness; advantageousness; benefit; profit; avail; service.—*Usefulness* is Anglo-Saxon, and *utility* is Latin; and hence the former is used chiefly of things in the *concrete*, while the latter is employed more in a *general* and *abstract* sense. Thus, we speak of the *utility* of an invention, and the *usefulness* of the thing invented; of the *utility* of an institution, and the *usefulness* of an individual. So *beauty* and *utility* (not *usefulness*) are brought into comparison. Still, the words are, in many cases, used interchangeably.

**Ü'til-i-zä'tion**, *n.* Act of utilizing, or state of being utilized.

**Ü'til-ize**, *v. t.* [*imp.* & *p. p.* UTILIZED; *p. pr.* & *vb. n.* UTILIZING.] To make useful; to turn to profitable account or use.

## V.

**V** (ve), the twenty-second letter of the English alphabet, represents a uniform consonant sound, as heard in *vain, eve*. Its form is only a variety of the character by which the vowel U is denoted, the latter being in its origin the cursive character employed with soft materials, while V is better adapted for engraving on stone. The two letters were formerly used indiscriminately, the one for the other. See *W.* See also *Prin. of Pron.*, § 101.

**Vā'eān-cy**, *n.* **1.** Quality of being vacant; emptiness; hence, freedom from employment; leisure; idleness. **2.** That which is vacant; as, (*a.*) Empty space; vacuity. **Good will**, (*a.*) Favor; kindness. (*b.*) Right intention. (*Law.*) See **GOOD-WILL**.— *Ill will*, enmity; unkindness.— *Will-with-a-wisp*, a luminous appearance sometimes seen in the air over moist ground, supposed to proceed from hydrogen gas; Jack-with-a-lantern; ignis-fatuus.

**Will**, *v. t.* [*imp.* **WILLED** and **WOULD**; *p. p.* **WILLED**; *p. pr.* & *vb. n.* **WILLING**.] [A.-S. *willan*, *willian*, Goth. *viljan*, Icel. *vilja*, allied to Lat. *velle*, *volo*, Gr. *βούλομαι*.] This verb has both an irregular and regular form. **1.** Irregular. [I *will*, thou *wilt*, he *will*; *imp.* *would*; *p. p.* *wanting*.] (*a.*) To wish; to desire. (*b.*) As an auxiliary, used to denote futurity dependent on the subject of the verb. Thus, in the first person, "I *will*" denotes willingness, consent, promise; and when "*will*" is emphasized, it denotes determination or fixed purpose. In the second and third persons, the idea of distinct volition, wish, or purpose, is evanescent, and simple certainty is appropriately expressed. To emphasize *will* denotes (according to the tone or context) certain futurity or fixed determination.

As in *shall* (which see), the second and third persons may be virtually converted into the first, either by question or indirect statement, so as to receive the meaning which belongs to *will* in that person.

In Ireland, Scotland, and the United States, especially in the southern and western portions of the United States, *will* is often improperly used for *shall*, and *would* for *should*, as in the following examples:—

I am able to devote as much time and attention to other subjects as I **WILL** [shall] be under the necessity of doing next winter. CHALMERS.

I **WOULD** [should] in vain attempt, adequately to express the emotions with which I received the testimonials of confidence and regard which you have recently addressed to me. JEFFERSON DAVIS.

**2.** Regular. [I *will*, thou *willest*, he *wills*; *imp.* & *p. p.* *willed*.] (*a.*) To determine by an act of choice; to ordain; to decree. (*b.*) To give or direct the disposal of by testament; to bequeath; to devise.

**Will** as the preterit of *will*, is chiefly employed in conditional, subjunctive, or optative senses. It is used for both present and future time, in conditional propositions, and *would have* for past time. It is never a past participle.

**Will**, *v. i.* **1.** To exercise an act of volition. **2.** To be inclined or disposed; to desire; to choose. **3.** To decide; to determine; to decree. **4.** To order or direct by testament.

**Will'ful**, *a.* [From *will* and *full*.] Governed by the will without yielding to reason.

See WIT, *v. i.*] [*Obs. or poet.*] 1. To know; to be aware. 2. To think; to suppose; to imagine.

**Wis'dōm**, *n.* [A.-S. *wisdōm*, from *wis*, wise, and the termination *dōm*, from *dōm*, doom, judgment, power.] 1. Quality of being wise; knowledge, and the capacity to make due use of it; discernment and judgment; discretion; sagacity. 2. Scientific or practical truth; acquired knowledge; crudition. 3. (*Script.*) Godliness; piety; religion.

**Syn.**—Prudence.—*Wisdom* has been defined to be "the use of the best means for attaining the best ends," and in this sense implies the union of high mental and moral excellence. *Prudence* is of a more negative character; it rather consists in avoiding danger than in taking decisive measures for the accomplishment of an object. Sir Robert Walpole was in many respects a *prudent* statesman, but he was far from being a *wis* one. Burke has remarked that *prudence*, when carried too far, degenerates into a "reptile virtue," which is the more dangerous for the plausible appearance it wears.

**Wis'dōm-toōth**, *n.*; *pl.* WIS'DŌM-TEETH. A large, back double tooth;—familarly so called because ap-

pearing comparatively late, as it were after the person has arrived at the age of wisdom.

**Wish'ful-ly**, *adv.* In a wishful manner; with desire, or ardent desire; with the show of desiring.

**Wish'y-wash'y**, *a.* Thin and pale; without force or solidity; also, very weak, when said of liquor.

**Wisp**, *n.* [Icel. & Dan. *wisk*, Ger. *wisch*. See WIIISK.] **1.** A small bundle of straw or other like substance. **2.** A whisk, or small broom.

**Wist**, *imp.* & *p. p.* of *wis*. See WIS. [Obs.]

**Wist'ful**, *a.* [From *wist*, pret. of *wis*, q. v.] Eagerly attentive; engrossed; hence, sometimes, with desire or longing; wishful.

**Wist'ful-ly**, *adv.* In a wistful manner.

**Wit**, *v. i.* [A.-S. *witan*.] To know; — now used only in the infinitive, to *wit*, which is employed, especially in legal language, to call attention to a particular thing, or to a more particular specification of what has preceded, and is equivalent to *namely*, that is to say.

**Wit**, *n.* [A.-S. *witt*, *wit*, *gewitt*, Icel. *vit*, O. H. Ger. *wizzi*. See *supra*.] **1.** Mind; intellect; understanding; sense. **2.** A mental faculty or power of the mind. **3.** Felicitous association of objects not usually connected, so as to produce a pleasant surprise; also, the power of readily combining objects in such a manner. **4.** A person of eminent sense or knowledge; a man of genius, fancy, or humor; one distinguished for bright or amusing sayings, for repartee, and the like.

**Syn.**— Ingenuity; humor; satire; sarcasm; irony; burlesque. — *Wit* formerly meant genius, and now denotes the power of seizing on some thought or occurrence, and, by a sudden turn, presenting it under aspects wholly new and unexpected — apparently natural and admissible, if not perfectly just, and bearing on the subject, or the parties concerned, with a laughable keenness and force. "What I want," said a pompous orator, aiming at his antagonist, "is common sense." "Exactly!" was the whispered reply. The pleasure we find in *wit* arises from the ingenuity of the turn, the sudden surprise it brings, and the patness of its application to the case, in the new and ludicrous relations thus flashed upon the view. *Humor* is a quality more congenial than *wit* to the English mind. It consists primarily in taking up the peculiarities of a *humorist* (a class of persons in which England abounds), and drawing them out, as Addison did those of Sir Roger de Coverley, so that we enjoy a hearty, good-natured laugh at the unconscious development he makes of his whims and oddities. From this original sense, the term has been widened to embrace other sources of kindly mirth of the same general character. In a

well-known caricature upon English reserve, an Oxford student is represented as standing on the brink of a river, greatly agitated at the sight of a drowning man before him, and crying out, "O that I had been introduced to this gentleman, that I might save his life!" The "Silent Woman" of Ben Jonson is one of the most humorous productions, in the original sense of the term, which we have in our language.

Walker condemns the pronunciation *wôond*, as a "expensive novelty." It is certainly opposed to an important principle of our language, namely, that words in *ou* of Anglo-Saxon origin retain the regular Old English sound of *ow*, as *sound*, *ground*, *found*, &c. It is to be observed, however, that in Anglo-Saxon, the word was spelt *wund*, the *u* being sounded as *ôo*, as it is, also, in the Icelandic *und*, and the Gothic *vunds*.

**Wound** (wôond or wownd), *v. t.* [*imp. & p. p.* WOUNDED; *p. pr. & vb. n.* WOUNDING.] To hurt by violence, as by a cut, stab, bruise, and the like; to injure; to damage; hence, often, to hurt the feelings of.

**Wrăth** (răth), *n.* [A.-S. *wræth*, Icel. *reidi*. See WROTH, *a.*] **1.** Violent anger; vehement exasperation; indignation; rage; fury; ire. **2.** The effects of anger; the just punishment of an offense or crime.

The English, misled by the *w*, which usually causes an *a* immediately following it in the same syllable to take a broad sound, universally pronounce this word *wrôth*, or *wrauth*; but this is contrary to analogy, for the *w* is silent, and the uttered letter *r* intervenes between it and the vowel; and besides, the letter *a* has its Italian sound, almost without exception, before *th*, as in *bath*, *path*, &c. The word is, however, sometimes spelled *wroth*.

**Syn.** — Anger; fury; rage; ire; vengeance; indignation; resentment; passion. See ANGER.

**Wrăth'ful** (răth'-), *a.* **1.** Full of wrath; very angry; greatly incensed. **2.** Springing from, or expressing, wrath.

## Y.

**Y** (wī), the twenty-fifth letter of the English alphabet, derives its form from the Greek Y. At the beginning of words or syllables, except when used as a prefix, it is a consonant element. In the middle and at the end of words it is a vowel, having precisely the same sounds as *i*. See *Prin. of Pron.*, §§ 35, 33, 54, 55, 105.

Y is used by ancient writers, especially Spenser, as a prefix of the past participle, used or omitted at will, and is also sometimes employed by modern writers in burlesque, or in imitation of the antique. The following are instances: *y-clad*, clad, clothed; *y-cleped*, called; *y-clothed*, clothed; *y-fed*, fed, refreshed.

**Y** (wī), *n.*; *pl.* **Y's** (wīz). 1. One of the forked pieces which support the pivots of a transit instrument, of the

**Yān'kee** (yānk'ē), *n.* [According to Heekewelder, a corrupt pronunciation of the word *English*, or of the French word *Anglais*, by the native Indians of America. According to Thierry, a corruption of *Jankin*, a diminutive of *John*, a nickname given to the English colonists of Connecticut by the Dutch settlers of New York. According to Dr. Wm. Gordon, it was a favorite cant word in Cambridge, Mass., as early as 1713, meaning *excellent*. He supposes that it was adopted by the students there as a by-word, and, being carried by them from the college, obtained currency in the other New England colonies, until at length it was taken up in other parts of the country, and applied to New Englanders generally, as a term of slight reproach. Cf. Scot. *yankie*, a sharp, clever, and rather bold woman, and Prov. Eng. *bow-yankies*, a kind of leggins worn by agricultural laborers.] A citizen of New England; also, a citizen of the Northern States; — a cant name, with a tinge of reproach in it, applied by foreigners to all inhabitants of the United States.

# METRIC SYSTEM OF WEIGHTS AND MEASURES.

SCALE,  $\frac{1}{20}$  of the Exact Size.

N. B. The edges of this cube are each 1 Meter, or 10 Decimeters, or 100 Centimeters, in length.

1 sq. Centimeter,  
Exact Size.

Dry  
Milliliter.

Liquid  
Milliliter.

In the Metric System, the Meter is the base of all the weights and measures employed.

The Meter was intended to be, and is very nearly, one ten millionth part of the distance measured on a meridian of the earth from the equator to the pole, and is about 39.37 inches.

The Meter is the primary unit of length.

Upon the Meter are based the following primary units: the Square Meter, the Are, the Cubic Meter or Stere, the Liter, and the Gram.

The Square Meter is the unit of measure for small surfaces; as the surface of a floor, table, etc.

The Are is the unit of land measure; this is a square whose side is 10 meters in length, and which contains 100 square meters.

The Cubic Meter, or Stere, is the unit of volume; this is a cube whose edge is 1 meter in length.

The Liter is the unit of capacity; this is the capacity of a cube whose edge is 1-10th of a meter in length.

The Gram is the unit of weight; this is the weight of distilled water contained in a cube whose edge is the 100th part of a meter in length.

From these primary units the higher and lower orders of units are derived decimally.

# A GLOSSARY

OF

## SCOTTISH WORDS AND PHRASES.

THE Scottish dialect — or language, as it is sometimes called — is spoken in the south-eastern or lowland counties of Scotland. It is closely allied to the English, being mainly derived from the Anglo-Saxon, while a considerable proportion of its words are of French origin. Unlike the English, however, it has borrowed very largely from the Gaelic — spoken in the northern counties, or Highlands — and also from the Danish. Scottish literature, which is mostly poetical, began in the 14th century, with John Barbour, a contemporary of Chaucer. The most eminent writers of this dialect, in recent times, are Allan Ramsay, Robert Burns, Walter Scott, James Hogg, John Wilson, and John Galt. As the productions of some of these authors, especially Burns and Scott, are extensively read in England and America, the want of a general Glossary of the words and phrases used by them is often felt. To supply this want the present compilation is offered to the public in the belief that it will be deemed a useful and not inappropriate addition to an English Dictionary. It has been revised by Mr. William Russell, the well-known elocutionist and scholar, who, as a native of Scotland and a resident in different parts of that country, has had peculiar opportunities of acquiring a thorough knowledge and perfect use of the rustic dialect in all its purity. The remarks which follow — except those relating to the differences between English and Scottish orthography — are from his pen.

The difficulty to be overcome in attempting to give an English or an American reader a correct idea of the *orthopy* of the Scottish dialect, is very great. The distinctive elementary sounds of the language of England and of Scotland, which two centuries ago were but slightly different to the ear, continue in the style of rural usage in Scotland but little changed, comparatively, from what they were; while, in England, modern usage, in city life especially, has undergone great changes; so that local dialect differs widely in the northern and southern parts of Great Britain. Even in Scotland, where time has had less effect in modifying spoken language, local differences of accent are to this day quite marked in character, and retain Danish, Norwegian, and Swedish modifications of utterance. Add to this fact another, — that, in the Scottish dialect, the words of Anglo-Saxon origin remain to a great extent unmodified in sound, while English usage has been greatly changed by the natural effect of the intermingling of Norman French in the daily communications of life between the conquering and the vanquished races. The natural consequence in these circumstances is, that it is exceedingly difficult for persons brought up in the rural districts of Scotland to acquire an appropriate style of English pronunciation; and it is much more difficult for Englishmen or Americans to read appropriately any passage written in the Scottish dialect. The very attempt, in the latter case, is, to the ears of a Scotchman, a ridiculous failure.

The remarks which follow will serve as illustrations of the radical difference in the style of pronunciation which characterizes the Scottish dialect, as contrasted with English usage, in regard to the distinctive sounds of letters.

1. The peculiar sound of *a* in such words as *swan*, *wasp*, *wash*, &c., English orthoëpists represent as nearly identical with the *o* of *nor* or *not*. In the Scottish dialect these words are pronounced with the sound of *a* as in *and*.

2. In such words as *man*, *can*, *fan*, *fat*, *that*, &c., the Scottish dialect adopts the sound of *a* as in *arm*, instead of the *a* in *and*.

3. The vowel *e*, occurring before the consonant *r*, when the latter is followed by a consonant, is given with the same sound as the *e* in *error*, instead of that modified sound which characterizes appropriate English and American usage at the present day. See *Prin. of Pron.* § 14, Note, p. ix.

4. The vowel *i*, in such words as *mile*, *time*, *dine*, &c., is, in the style of Scottish utterance, much closer than it is even in the usage of the most refined style of English society. The Scottish style, while it avoids the drawling roundness and great breadth characteristic of rustic English, in the utterance of the long sound of *i*, runs to the opposite extreme, and pinches it down to the same narrowness which belongs to the local style of Irish utterance.

5. A marked peculiarity of Scottish utterance occurs in all words containing the short sound of *i*, as in *dim*, *him*, *sin*, *bit*, *lip*, &c. In these and similar cases, the current usage of Scotland seems to border on *dem*, *hem*, *sen*, *bet*, *lep*, &c.

6. In all words which, according to English orthoëpy, are pronounced as marked in the dictionary, with the sound of *o* given as in the word *on*, the local usage of Scotland adopts that of *o* in *old*, without its proper prolongation and “vanish” (see *Prin. of Pron.* § 19, p. ix.); or, in other words, gives “long” or “close” *o*, cut short, but still remaining close. This class of words is very numerous, and so becomes peculiarly characteristic. It might be indicated thus; *ōn*, *ōff*, *sōft*, *lōst*, *rōd*, *sōd*, &c.

7. In many words in which English usage gives to the vowel *u* the same sound which it has in the word *use*, the Scottish dialect gives a sound not existing in any form of English utterance, but corresponding exactly to that of *u* in the French word *plume*. To this style belong all such words as *tune*, *use* (the noun), *sure*, *dub*; also the words *moon*, *soon*, *done*, &c. See Remark 5, p. 912.

8. The diphthong *ae*, in Scottish orthography, represents precisely the sound of the acute *é* of the French language, or of the initial element of the English *a* in *ale*. See *Prin. of Pron.* § 2, p. 7.

9. *Ei* and *ey*, in Scottish pronunciation, are subject to the same remark as the vowel *i*. See Remark 4.

10. The diphthong *oi* is given as *i* long; thus, *boil* (*bile*), *toil* (*tile*), *moil* (*mile*), *join* (*jine*), &c.

11. The diphthong *oo*, in Scottish usage, in the words *moor*, *floor*, &c., take the sound of *eu* in the French word *peur*. See Remark 12, p. 912.

12. The diphthongs *ou* and *ow*, in Scottish utterance, are given like *oo* in the word *ooze*; thus, *our* (*oor*), *cow* (*coo*), *out* (*oot*), *house* (*hoos*).

13. The diphthong *ui*, as in *guid*, *puir*, &c., represents the sound of *u* in the French word *plume*, somewhat broadened. See Remark, 7 above.

14. The letter *r* has, in Scottish usage, one uniformly hard and prolonged rolling sound, as in all the continental languages of Europe, and in the local style of Ireland. Thus, *arm* is pronounced with *r* made very forcible. So with all other words in which *r* occurs; thus, *farm*, *farther*, *turner*, *harper*, *truer*, &c. See *Prin. of Pron.* § 89, p. xv.

15. *Ch*, as in *aneuch*, and *gh*, as in *laugh*, represent a very strong, harsh, guttural sound of the English element *h*, corresponding to the German *ch* in *doch*. In such words as *abeigh*, *steigh*, &c., the *gh* represents a similar sound, but more delicate and close, — a palatal or oral rather than a guttural element, — corresponding to the pronunciation of *ch* in the German words *ich*, *echt*, *reich*.

To these remarks on the leading peculiarities of Scottish pronunciation, may be added the following general rules respecting the distinctions between English and Scottish orthography, in words which were originally the same, having only a letter changed for another, or sometimes one taken away or added.

I. — In many words ending in English with an *l*, after an *a* or *u*, the *l* is rarely sounded in Scotland, and hence is omitted in writing them: as All (English), *A'* (Scots); Call, *Ca'*; Small, *Sma'*; Full, *Fu'*; Pull, *Pu'*; &c. The apostrophe is merely of modern use.

II. — The *l* changes in Scotland to a *w* or *u* after *a* or *o*, and is frequently sunk before another consonant; as, Balm, *Bawm*; Balk, *Bauk*; False, *Fause*; Malt, *Maut*; Boll, *Bow*; Poll, *Pow*; &c.

III. — An *o* before *ld*, changes to *a* or *au*; as, Old, *Auld*; Bold, *Bauld*; Cold, *Cauld*; Told, *Tauld*; &c.

IV. — *O*, *oe*, and *ow*, are changed to *a*, *ae*, or *ai*; as, Off, *Aff*; Toe, *Tae*; Own, *Ain*; Cloth, *Claith*; Most, *Maist*; Song, *Sang*; &c.

V. — *O* and *u* are frequently changed into *i*; as, Another, *Anither*; Brother, *Brither*; Foot, *Fit*; Honey, *Hinny*; Nuts, *Nits*; Run, *Rin*; &c.

# A VOCABULARY

## OF

### PERFECT AND ALLOWABLE RHYMES.

#### DIRECTIONS FOR FINDING RHYMES.

1. In looking for a word in the following vocabulary, consider the five vowels, *A, E, I, O, U*, and begin at the vowel that precedes the last consonant of the word; for example, to find *persuade*, and the words that rhyme to it, *D* is the last consonant, *A* the vowel that precedes it; look for *ADE*, and you will find *made, fade, invade*, and all the other words of that rhyme.

2. In like manner, if a word end in two or more consonants, begin at the vowel that immediately precedes the first of them; for example, *land*; *N* is first of the final consonants, *A* the vowel that precedes it; see *AND*, and you will find *band, stand, command, &c.*

3. But if a diphthong, that is to say, two or more vowels together, precedes the last consonant or consonants of a

word, begin at the first of these two vowels; thus, to find the rhymes to *disdain*, look not for *IN* but for *AIN*, and you will find *brain, chain, gain, &c.*

4. To find a word that ends in a diphthong preceded by a consonant, begin only at the first vowel of the diphthong; for example, to find the rhymes to *subdue*, look for *UE*, and you will find *clue, due, ensue, &c.*

5. All the words that end in a single vowel, preceded by a consonant, are found by looking for that vowel only, except always the words that end in mute *E*, which are constantly found by the same method that has been already prescribed for finding the rhymes to *persuade*, whose final *E* is silent, and serves only to lengthen the sound of the *A* in the last syllable.
